

BlazeDemo Automation Framework

Detailed Test Execution Report

Project Information

Project Name: BlazeDemo Automation Framework

Prepared By: Nishant Kumar

Application URL: <https://blazedemo.com/>

GitHub Repository: https://github.com/NishantKumar7007/WIPRO_Capstone.git

Framework: Selenium WebDriver + Java + TestNG + Maven + POM

Execution Date: Successful Test Execution

1. Execution Summary

Metric	Result
Total Tests Executed	4
Passed	4
Failed	0
Skipped	0
Success Rate	100%
Execution Status	SUCCESS

2. Test Case Execution Details

TC_01 – End-to-End Flight Booking

Parameter	Value
Departure City	Boston

Parameter	Value
Destination City	London
Passenger Name	Nishant Kumar
Flight Index Selected	1

Execution Steps

- ✓ Search Flight – Passed
- ✓ Verify Flight List – Passed
- ✓ Select Flight – Passed
- ✓ Verify Purchase Page – Passed
- ✓ Enter Passenger Details – Passed
- ✓ Enter Payment Details – Passed
- ✓ Purchase Flight – Passed
- ✓ Verify Confirmation Message – Passed

Final Status

● PASS

TC_02 – End-to-End Flight Booking

Parameter	Value
Departure City	Paris
Destination City	Rome
Passenger Name	Prakash Kumar
Flight Index Selected	2

Execution Steps

- ✓ Search Flight – Passed
- ✓ Verify Flight List – Passed

- ✔ Select Flight – Passed
- ✔ Verify Purchase Page – Passed
- ✔ Enter Passenger Details – Passed
- ✔ Enter Payment Details – Passed
- ✔ Purchase Flight – Passed
- ✔ Verify Confirmation Message – Passed

Final Status

● PASS

TC_03 – End-to-End Flight Booking

Parameter	Value
Departure City	Portland
Destination City	London
Passenger Name	Shubham Kumar
Flight Index Selected	3

Execution Steps

- ✔ Search Flight – Passed
- ✔ Verify Flight List – Passed
- ✔ Select Flight – Passed
- ✔ Verify Purchase Page – Passed
- ✔ Enter Passenger Details – Passed
- ✔ Enter Payment Details – Passed
- ✔ Purchase Flight – Passed
- ✔ Verify Confirmation Message – Passed

Final Status

 PASS

TC_04 – End-to-End Flight Booking

Parameter	Value
Departure City	Mexico City
Destination City	Dublin
Passenger Name	Ravi Singh
Flight Index Selected	4

Execution Steps

-  Search Flight – Passed
-  Verify Flight List – Passed
-  Select Flight – Passed
-  Verify Purchase Page – Passed
-  Enter Passenger Details – Passed
-  Enter Payment Details – Passed
-  Purchase Flight – Passed
-  Verify Confirmation Message – Passed

Final Status

 PASS

3. TestNG Execution Summary

Default Suite

Metric	Result
Total Tests Run	4
Passes	4
Failures	0
Skips	0

Overall Result

- BUILD SUCCESS
 - ALL TEST CASES PASSED
 - NO FAILURES DETECTED
 - AUTOMATION EXECUTION COMPLETED SUCCESSFULLY
-

4. Framework Features Validated

- ✓ Page Object Model (POM)
- ✓ Data Driven Testing using Excel
- ✓ TestNG Framework
- ✓ Selenium WebDriver Automation
- ✓ Extent Report Generation
- ✓ Screenshot Capture
- ✓ Jenkins CI/CD Integration
- ✓ Maven Build Execution
- ✓ Listener Implementation

5. Conclusion

The BlazeDemo Automation Framework successfully executed all four end-to-end flight booking scenarios using Excel-driven test data. All validations passed successfully without any failures or skipped tests. The framework demonstrated stability, maintainability, and reusability through Page Object Model design, TestNG execution, automated reporting, screenshot capture, and Jenkins CI/CD integration.

Final Execution Status

 SUCCESS
